ELECTRONIC DISCOVERY: PROCEDURAL & EVIDENTIARY ISSUES
Semester: Spring 2014

Course Number: LITG 7072 001          Call Number: 000023
Professor: Kane and Allman
Credits: 2 Classroom
Primary Basis for the Grade: Tentatively exam; Letter grade
Prerequisites: None

Enrollment: Open
Meets Seminar Requirement? No
Meets Writing Requirement? No
Meets Client Counseling Requirement? No
Meeting Times: Monday 4:00-5:50
Location: 302

COURSE DESCRIPTION:

Electronic discovery plays an important and increasingly high-profile role in modern litigation. This course will provide a comprehensive study of electronic discovery issues, blending an in-depth analysis of legal principles with the study of their application in practice. No special technological background or expertise is necessary for success in the class. In addition to the professors (a litigation partner who leads the ediscovery practice at an international law firm and a former general counsel of a Fortune 500 company who is the chair emeritus of The Sedona Conference), class instruction will include presentations by guest speakers from the ediscovery field (in-house counsel, technology professionals, and judges). The goal for the class is to provide students with a thorough understanding of legal issues in ediscovery and, for those who may pursue a litigation practice, the practical ability to apply that understanding in actual cases.
