

Researching Judges

Conducting judicial research can provide many strategic advantages for both practicing attorneys and law students. As an attorney, researching a judge you will appear before in court will allow you to understand the judge’s ruling style, how his or her courtroom is run and to calculate the best way to present your case to that particular judge. Similarly, law students interested in clerking for a judge will be able to use information about that judge’s prior decisions, past legal and educational background and other personal affiliations to prepare for an interview with the judge.
