COURSE DESCRIPTION:

This course serves the dual purpose of equipping students to succeed on the written portions of bar examinations and preparing for legal practice by developing and honing skills relevant to legal analysis, professional and effective written communication, principled advocacy, and management of legal work. Students will receive instruction, practice, critical peer review, and coaching in these skills that will be valuable in taking a bar examination in Ohio or any other jurisdiction. Students will practice these skills using model and previously-administered essays and Multistate Performance Tests (MPTs). Students will also engage in self-assessment exercises addressing learning styles and time/work management issues. Although students will have an opportunity to review some core legal concepts, the focus of this course will be on practicing and developing the professional skills necessary to pass a bar examination and enter the legal profession.

This course is not intended to substitute for a bar preparation course taken after Hooding that can help students review core concepts learned throughout law school and learn legal concepts not studied in law school and specific to the jurisdiction in which students wish to practice. Instead, this course will build a strong foundation in the skills necessary to be successful on a bar exam.
